

# Join the SMUD Contractor Network today!

The SMUD Contractor Network is a valuable resource for local contractors to tap into new business opportunities and for SMUD customers to find help for their home improvement projects. Apply today to access the following benefits:

## **SMUD rebate eligibility**

Contractors must be enrolled in the SMUD Contractor Network before they can offer SMUD rebates to customers. SMUD offers rebates for heat pump HVAC systems and for electrical upgrades to make customer homes all-electric ready.

## **Lead generation from online directory**

The online directory at **SMUDContractorNetwork.org** makes it easy for customers to find and connect with contractors. Customers search for contractors by using criteria such as specialty, location, language or other options. The directory provides a list of contractors matching the customer's needs. Search results include detailed information about the contractor, a direct link to their website and a one-click email tool for direct communication at no cost to the contractor.

## **Training and resources**

The SMUD Contractor Network is a dedicated source of information for contractors, including program documents, an event calendar and announcements. Additionally, SMUD has partnered with the Electric and Gas Industries Association (EGIA), a local nonprofit dedicated to contractor success. SMUD also provides contractors access to an online portal with program resources and hundreds of videos and other resources to help contractors improve and grow their businesses.

## **Joining is easy**

The first step to becoming a Participating Contractor is to log on to **SMUDContractorNetwork.org/login** and create a user account. After you create your account, please provide the required information, complete and submit your application. We'll verify that your company meets SMUD's eligibility requirements and notify you upon acceptance into the SMUD Contractor Network.
